

**Anti-MLANA/Mart 1 Rabbit Monoclonal Antibody**  
**Catalog # ABO13653****Specification****Anti-MLANA/Mart 1 Rabbit Monoclonal Antibody - Product Information**

Application	WB, IHC, IF, ICC, FC
Primary Accession	<a href="#">Q16655</a>
Host	Rabbit
Isotype	Rabbit IgG
Reactivity	Human
Clonality	Monoclonal
Format	Liquid

**Description**

Anti-MLANA/Mart 1 Rabbit Monoclonal Antibody . Tested in WB, IHC, ICC/IF, Flow Cytometry applications. This antibody reacts with Human.

**Anti-MLANA/Mart 1 Rabbit Monoclonal Antibody - Additional Information****Gene ID** 2315**Other Names**

Melanoma antigen recognized by T-cells 1, MART-1, Antigen LB39-AA, Antigen SK29-AA, Protein Melan-A, MLANA, MART1

**Calculated MW**

13157 MW KDa

**Application Details**

WB 1:1000-1:2000&lt;br&gt;IHC 1:50-1:200&lt;br&gt;ICC/IF 1:50-1:200&lt;br&gt;FC 1:200

**Subcellular Localization**

Endoplasmic reticulum membrane; Single-pass type III membrane protein. Golgi apparatus. Golgi apparatus, trans-Golgi network membrane. Melanosome. Also found in small vesicles and tubules dispersed over the entire cytoplasm. A small fraction of the protein is inserted into the membrane in an inverted orientation. Inversion of membrane topology results in the relocalization of the protein from a predominant Golgi/post- Golgi area to the endoplasmic reticulum. Melanoma cells expressing the protein with an inverted membrane topology are more effectively recognized by specific cytolytic T-lymphocytes than those expressing the protein in its native membrane orientation.

**Tissue Specificity**

Expression is restricted to melanoma and melanocyte cell lines and retina.

**Contents**

Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol, 0.4-0.5mg/ml BSA.

**Immunogen**

A synthesized peptide derived from human MLANA

**Purification**

Affinity-chromatography

**Storage**

**Store at -20°C for one year. For short term storage and frequent use, store at 4°C for up to one month. Avoid repeated freeze-thaw cycles.**

**Anti-MLANA/Mart 1 Rabbit Monoclonal Antibody - Protein Information**

**Name** MLANA

**Synonyms** MART1

**Function**

Involved in melanosome biogenesis by ensuring the stability of GPR143. Plays a vital role in the expression, stability, trafficking, and processing of melanocyte protein PMEL, which is critical to the formation of stage II melanosomes.

**Cellular Location**

Endoplasmic reticulum membrane; Single-pass type III membrane protein. Golgi apparatus. Golgi apparatus, trans-Golgi network membrane. Melanosome. Note=Also found in small vesicles and tubules dispersed over the entire cytoplasm. A small fraction of the protein is inserted into the membrane in an inverted orientation. Inversion of membrane topology results in the relocalization of the protein from a predominant Golgi/post-Golgi area to the endoplasmic reticulum. Melanoma cells expressing the protein with an inverted membrane topology are more effectively recognized by specific cytolytic T-lymphocytes than those expressing the protein in its native membrane orientation

**Tissue Location**

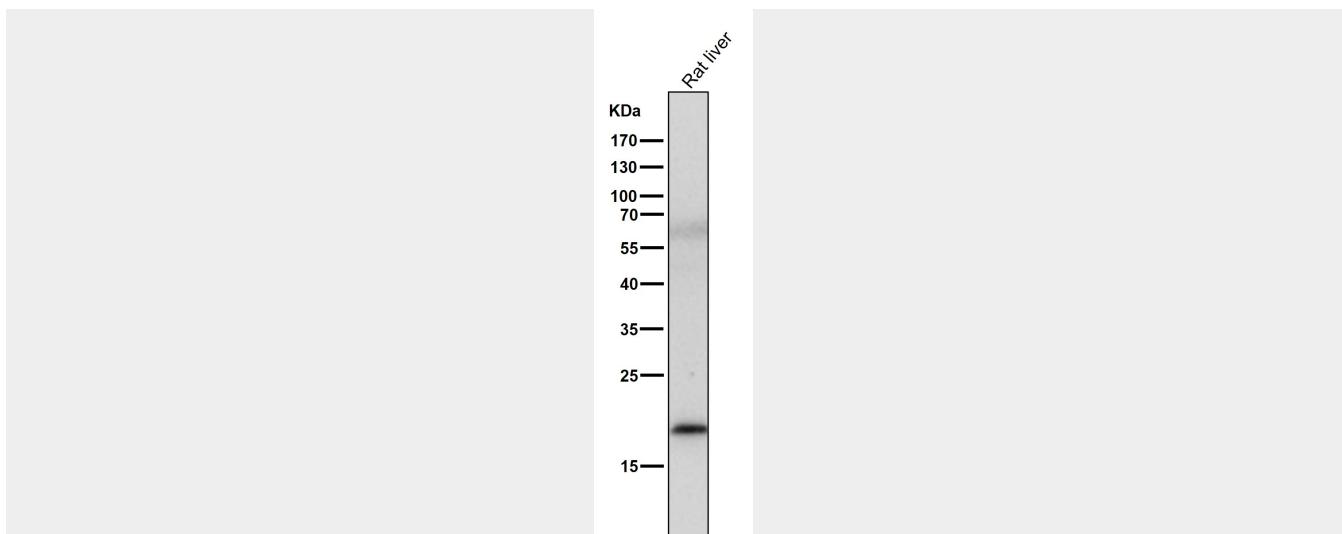

Expression is restricted to melanoma and melanocyte cell lines and retina

**Anti-MLANA/Mart 1 Rabbit Monoclonal Antibody - Protocols**

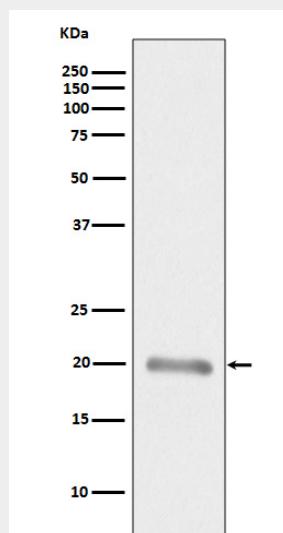

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

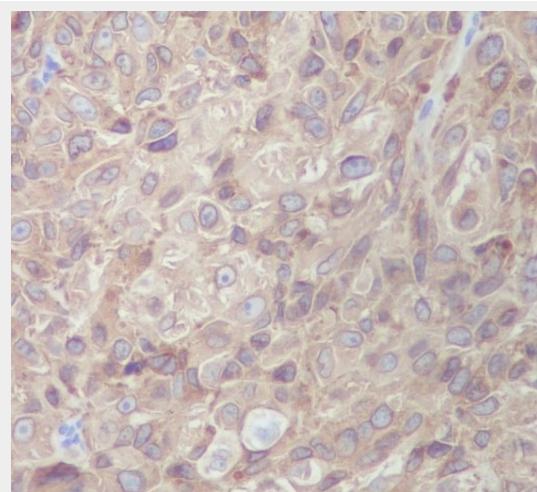

**Anti-MLANA/Mart 1 Rabbit Monoclonal Antibody - Images**

All lanes use the Antibody at 1:1K dilution for 1 hour at room temperature.

Western blot analysis of MLANA expression in Human melanoma tissue lysate.

Immunohistochemical analysis of paraffin-embedded human melanoma, using MLANA Antibody.
