

# CD79a

Rabbit Monoclonal antibody(Mab)
Catalog # AD80015

# **Specification**

# CD79a - Product info

Application IHC-P
Primary Accession P11912
Reactivity Human
Host Rabbit
Clonality Monoclonal
Calculated MW 25038

#### CD79a - Additional info

Gene ID 973
Gene Name CD79A

**Other Names** 

B-cell antigen receptor complex-associated protein alpha chain, Ig-alpha, MB-1 membrane glycoprotein, Membrane-bound immunoglobulin-associated protein, Surface IgM-associated protein, CD79a, CD79A, IGA, MB1

**Dilution** 

IHC-P~~Ready-to-use

Storage

Maintain refrigerated at 2-8°C

Precautions CD79a Antibody is for research use only

and not for use in diagnostic or

therapeutic procedures.

## **CD79a - Protein Information**

Name CD79A

**Function** 

Synonyms IGA, MB1

initiation of the signal transduction cascade activated by binding of antigen to the B-cell antigen receptor complex (BCR) which leads to internalization of the complex, trafficking to late endosomes and antigen presentation. Also required for BCR surface expression and for efficient differentiation of pro- and pre-B-cells.

activation. Binds to BLNK, bringing BLNK into proximity with SYK and allowing SYK

Stimulates SYK autophosphorylation and

Required in cooperation with CD79B for

to phosphorylate BLNK. Also interacts with and increases activity of some Src- family tyrosine kinases. Represses BCR signaling during development of immature B-cells. Cell membrane; Single-pass type I membrane protein. Note=Following antigen binding, the BCR has been shown to translocate from detergent-soluble regions of the cell membrane to lipid rafts although signal transduction through the complex can also occur outside lipid rafts. B-cells.

## CD79a - Protocols

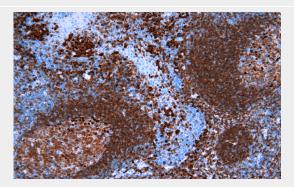

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

# CD79a - Images

Tonsil

Immunohistochemical analysis of paraffin-embedded human tonsil tissue using AD80015 performed on the Abcarta® FAIP-30 Fully automated IHC platform. Tissue was fixed with formaldehyde at room temperature, antigen retrieval was by heat mediation with a Citrate buffer (pH6. 0). Samples were incubated with primary antibody (Ready-to-use) for 15 min at room

temperature. AmpSeeTM Detection Systems[]Abcepta:AR005[] was used as the secondary antibody.
