

**Goat Anti-CTLA + CTLB Antibody**  
**Peptide-affinity purified goat antibody**  
**Catalog # AF1286a****Specification**

---

**Goat Anti-CTLA + CTLB Antibody - Product Information**

|                   |   |
|-------------------|---|
| Application       | WB, E   |
| Primary Accession | <a href="#">P09496</a>  |
| Other Accession   | <a href="#">NP_009028</a> , <a href="#">1211</a> , <a href="#">1212</a> , <a href="#">12757 (mouse)</a> , <a href="#">83800 (rat)</a> |
| Reactivity        | Human   |
| Predicted         | Mouse, Rat, Dog   |
| Host              | Goat  |
| Clonality         | Polyclonal  |
| Concentration     | 100ug/200ul   |
| Isotype           | IgG   |
| Calculated MW     | 27077   |

**Goat Anti-CTLA + CTLB Antibody - Additional Information****Gene ID** 1211**Other Names**

Clathrin light chain A, Lca, CLTA

**Dilution**

WB~~1:1000

E~~N/A

**Format**

0.5 mg IgG/ml in Tris saline (20mM Tris pH7.3, 150mM NaCl), 0.02% sodium azide, with 0.5% bovine serum albumin

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

Goat Anti-CTLA + CTLB Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

**Goat Anti-CTLA + CTLB Antibody - Protein Information****Name** CLTA**Function**

Clathrin is the major protein of the polyhedral coat of coated pits and vesicles. Acts as a

component of the TACC3/ch- TOG/clathrin complex proposed to contribute to stabilization of kinetochore fibers of the mitotic spindle by acting as inter- microtubule bridge (PubMed:<a href="http://www.uniprot.org/citations/15858577" target="\_blank">15858577</a>, PubMed:<a href="http://www.uniprot.org/citations/21297582" target="\_blank">21297582</a>).

#### Cellular Location

Cytoplasmic vesicle membrane; Peripheral membrane protein; Cytoplasmic side. Membrane, coated pit; Peripheral membrane protein; Cytoplasmic side. Cytoplasm, cytoskeleton, spindle Note=Cytoplasmic face of coated pits and vesicles. In complex with TACC3 and CKAP5 (forming the TACC3/ch-TOG/clathrin complex) localized to inter-microtubule bridges in mitotic spindles.

### Goat Anti-CTLA + CTLB Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

### Goat Anti-CTLA + CTLB Antibody - Images

AF1286a (0.1 µg/ml) staining of Human Frontal Cortex lysate (35 µg protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.

### Goat Anti-CTLA + CTLB Antibody - Background

Clathrin is a large, soluble protein composed of heavy and light chains. It functions as the main structural component of the lattice-type cytoplasmic face of coated pits and vesicles which entrap specific macromolecules during receptor-mediated endocytosis. This gene encodes one of two clathrin light chain proteins which are believed to function as regulatory elements. Alternative splicing results in multiple transcript variants. Related pseudogenes have been identified on chromosomes 8 and 12.
