

Glucogon receptor Antibody (internal region, near the C-Term) Peptide-affinity purified goat antibody Catalog # AF2587a

## Specification

# Glucogon receptor Antibody (internal region, near the C-Term) - Product Information

Application Primary Accession Other Accession Predicted Host Clonality Concentration Isotype Calculated MW

E <u>P47871</u> NP\_000151.1, 2642 Human Goat Polyclonal 0.5 mg/ml IgG 54009

## Glucogon receptor Antibody (internal region, near the C-Term) - Additional Information

Gene ID 2642

Other Names Glucagon receptor, GL-R, GCGR

Dilution E~~N/A

**Format** 0.5 mg/ml in Tris saline, 0.02% sodium azide, pH7.3 with 0.5% bovine serum albumin

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

Glucogon receptor Antibody (internal region, near the C-Term) is for research use only and not for use in diagnostic or therapeutic procedures.

## Glucogon receptor Antibody (internal region, near the C-Term) - Protein Information

Name GCGR

#### Function

G-protein coupled receptor for glucagon that plays a central role in the regulation of blood glucose levels and glucose homeostasis. Regulates the rate of hepatic glucose production by promoting glycogen hydrolysis and gluconeogenesis. Plays an important role in mediating the responses to fasting. Ligand binding causes a conformation change that triggers signaling via guanine nucleotide-binding proteins (G proteins) and modulates the activity of down-stream effectors, such

as adenylate cyclase. Promotes activation of adenylate cyclase. Besides, plays a role in signaling via a phosphatidylinositol-calcium second messenger system.

### **Cellular Location**

Cell membrane; Multi-pass membrane protein. Note=Is rapidly internalized after ligand-binding

### Glucogon receptor Antibody (internal region, near the C-Term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>
