#### Goat anti-PTGFR Antibody - Protein Information

Name PTGFR

Function

Receptor for prostaglandin F2-alpha (PGF2-alpha). The activity of this receptor is mediated by G

proteins which activate a phosphatidylinositol-calcium second messenger system. Initiates luteolysis in the corpus luteum (By similarity). Isoforms 2 to 7 do not bind PGF2-alpha but are proposed to modulate signaling by participating in variant receptor complexes; heterodimers between isoform 1 and isoform 5 are proposed to be a receptor for prostamides including the synthetic analog bimatoprost.

**Cellular Location** Cell membrane; Multi-pass membrane protein.

Tissue Location Eye..
