SURF4 Antibody (N-Terminus) - Protein Information**Name** SURF4 {ECO:0000303|PubMed:18287528, ECO:0000312|HGNC:HGNC:11476}**Function**

Endoplasmic reticulum cargo receptor that mediates the export of lipoproteins by recruiting cargos into COPII vesicles to facilitate their secretion (PubMed:[29643117](http://www.uniprot.org/citations/29643117), PubMed:[30251625](http://www.uniprot.org/citations/30251625), PubMed:[33186557](http://www.uniprot.org/citations/33186557)). Acts as a cargo receptor for lipoproteins bearing both APOB and APOA1, thereby regulating lipoprotein delivery and the maintenance of lipid homeostasis (PubMed:[29643117](http://www.uniprot.org/citations/29643117), PubMed:[33186557](http://www.uniprot.org/citations/33186557)). Synergizes with the GTPase SAR1B to mediate transport of circulating lipoproteins (PubMed:[33186557](http://www.uniprot.org/citations/33186557)). Promotes the

secretion of PCSK9 (PubMed:30251625). Also mediates the efficient secretion of erythropoietin (EPO) (PubMed:32989016). May also play a role in the maintenance of the architecture of the endoplasmic reticulum-Golgi intermediate compartment and of the Golgi (PubMed:18287528).

Cellular Location

Endoplasmic reticulum membrane; Multi-pass membrane protein. Endoplasmic reticulum-Golgi intermediate compartment membrane; Multi- pass membrane protein. Golgi apparatus membrane; Multi-pass membrane protein. Note=Active at endoplasmic reticulum exit sites (ERES) where it is incorporated together with its lipoprotein cargos into COPII-coated vesicles. From the Golgi it is recycled back to the endoplasmic reticulum.
