

GPI Antibody (clone 4B11)
Mouse Monoclonal Antibody
Catalog # ALS16950**Specification**

GPI Antibody (clone 4B11) - Product Information

Application	WB, IHC-P, IF
Primary Accession	P06744
Other Accession	2821
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Isotype	IgG1
Calculated MW	63147
Dilution	WB~~1:1000 IHC-P~~N/A IF~~1:50~200

GPI Antibody (clone 4B11) - Additional Information**Gene ID** 2821**Other Names**

GPI, AMF, Autocrine motility factor, Glucose phosphate isomerase, Hexose monophosphate isomerase, Hexosephosphate isomerase, Neuroleukin, Oxoisomerase, Phosphoglucose isomerase, Phosphohexomutase, Phosphohexose isomerase, SA36, PGI, SA-36, Glucose-6- ...

Target/Specificity

Human GPI

Reconstitution & Storage

PBS, pH 7.3, 1% BSA, 50% glycerol, 0.02% sodium azide. Store at -20°C. Minimize freezing and thawing.

Precautions

GPI Antibody (clone 4B11) is for research use only and not for use in diagnostic or therapeutic procedures.

GPI Antibody (clone 4B11) - Protein Information**Name** GPI {ECO:0000303|PubMed:2387591, ECO:0000312|HGNC:HGNC:4458}**Function**

In the cytoplasm, catalyzes the conversion of glucose-6- phosphate to fructose-6-phosphate, the second step in glycolysis, and the reverse reaction during gluconeogenesis (PubMed:28803808). Besides it's role as a glycolytic enzyme, also acts as a secreted cytokine: acts as an angiogenic factor (AMF) that stimulates endothelial cell motility (PubMed:<a

[11437381](http://www.uniprot.org/citations/11437381)). Acts as a neurotrophic factor, neuroleukin, for spinal and sensory neurons (PubMed:[11004567](http://www.uniprot.org/citations/11004567), PubMed:[3352745](http://www.uniprot.org/citations/3352745)). It is secreted by lectin-stimulated T-cells and induces immunoglobulin secretion (PubMed:[11004567](http://www.uniprot.org/citations/11004567), PubMed:[3352745](http://www.uniprot.org/citations/3352745)).

Cellular Location

Cytoplasm. Secreted

GPI Antibody (clone 4B11) - Protocols

Provided below are standard protocols that you may find useful for product applications.

GPI Antibody (clone 4B11) - Background

Besides its role as a glycolytic enzyme, mammalian GPI can function as a tumor-secreted cytokine and an angiogenic factor (AMF) that stimulates endothelial cell motility. GPI is also a neurotrophic factor (Neuroleukin) for spinal and sensory neurons.
