

## Anti-BMP2 Antibody (aa226-275)

Rabbit Anti Human Polyclonal Antibody Catalog # ALS18089

### **Specification**

# Anti-BMP2 Antibody (aa226-275) - Product Information

Application WB, IHC-P, E

Primary Accession P12643

Predicted Human, Mouse, Rat Host Rabbit

Clonality Polyclonal Isotype IgG

Calculated MW 44702

Dilution WB~~1:1000 IHC-P~~N/A E~~N/A

# Anti-BMP2 Antibody (aa226-275) - Additional Information

Gene ID 650

Alias Symbol BMP2

**Other Names** 

BMP2, BDA2, BMP-2, BMP-2A, BMP2A, Bone morphogenetic protein 2, Bone morphogenetic protein 2A

Target/Specificity

BMP-2 antibody detects endogenous levels of BMP-2.

**Reconstitution & Storage** 

Immunoaffinity purified

**Precautions** 

Anti-BMP2 Antibody (aa226-275) is for research use only and not for use in diagnostic or therapeutic procedures.

# Anti-BMP2 Antibody (aa226-275) - Protein Information

Name BMP2

Synonyms BMP2A

#### **Function**

Growth factor of the TGF-beta superfamily that plays essential roles in many developmental processes, including cardiogenesis, neurogenesis, and osteogenesis (PubMed:<a href="http://www.uniprot.org/citations/18436533" target="\_blank">18436533</a>, PubMed:<a href="http://www.uniprot.org/citations/24362451" target="\_blank">24362451</a>, PubMed:<a href="http://www.uniprot.org/citations/31019025" target="\_blank">31019025</a>). Induces

Tel: 858.875.1900 Fax: 858.875.1999

cartilage and bone formation (PubMed: <a href="http://www.uniprot.org/citations/3201241" target=" blank">3201241</a>). Initiates the canonical BMP signaling cascade by associating with type I receptor BMPR1A and type II receptor BMPR2 (PubMed: <a href="http://www.uniprot.org/citations/15064755" target="\_blank">15064755</a>, PubMed:<a href="http://www.uniprot.org/citations/17295905" target="blank">17295905</a>, PubMed:<a href="http://www.uniprot.org/citations/18436533" target="blank">18436533</a>). Once all three components are bound together in a complex at the cell surface, BMPR2 phosphorylates and activates BMPR1A (PubMed: <a href="http://www.uniprot.org/citations/7791754" target=" blank">7791754</a>). In turn, BMPR1A propagates signal by phosphorylating SMAD1/5/8 that travel to the nucleus and act as activators and repressors of transcription of target genes. Also acts to promote expression of HAMP, via the interaction with its receptor BMPR1A/ALK3 (PubMed: <a href="http://www.uniprot.org/citations/31800957" target=" blank">31800957</a>). Can also signal through non-canonical pathways such as ERK/MAP kinase signaling cascade that regulates osteoblast differentiation (PubMed: <a href="http://www.uniprot.org/citations/16771708" target=" blank">16771708</a>, PubMed:<a href="http://www.uniprot.org/citations/20851880" target="blank">20851880</a>). Also stimulates the differentiation of myoblasts into osteoblasts via the EIF2AK3-EIF2A-ATF4 pathway by stimulating EIF2A phosphorylation which leads to increased expression of ATF4 which plays a central role in osteoblast differentiation (PubMed:<a href="http://www.uniprot.org/citations/24362451" target=" blank">24362451</a>). Acts as a positive regulator of odontoblast differentiation during mesenchymal tooth germ formation, expression is repressed during the bell stage by MSX1-mediated inhibition of CTNNB1 signaling (By similarity).

**Cellular Location** Secreted.

#### **Tissue Location**

Particularly abundant in lung, spleen and colon and in low but significant levels in heart, brain, placenta, liver, skeletal muscle, kidney, pancreas, prostate, ovary and small intestine

#### Anti-BMP2 Antibody (aa226-275) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture
