

Calbindin Antibody

Mouse Monoclonal Antibody Catalog # AN1259

Specification

Calbindin Antibody - Product Information

Application WB, IHC, IF Primary Accession P05937

Reactivity Human, Mouse, Bovine

Host Mouse
Clonality Monoclonal
Isotype IgG2a
Calculated MW 30025

Calbindin Antibody - Additional Information

Gene ID 793
Gene Name CALB1

Target/Specificity

Recombinant full length human calbindin purified from E. coli.

Dilution

WB~~ 1:1000 IHC~~1:100~500 IF~~ 1:1000

Format

Protein G purified culture supernatant

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

Calbindin Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Shipping

Blue Ice

Calbindin Antibody - Protocols

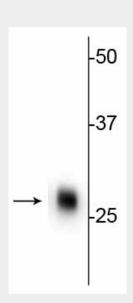

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence

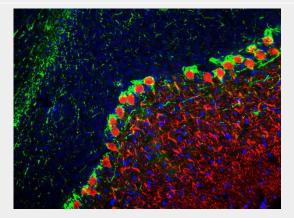

- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

Calbindin Antibody - Images

Western blot of rat cerebellar lysate showing specific immunolabeling of the \sim 28 kDa calbindin protein.

Immunostaining of rat cerebellum showing specific labeling of calbindin (red) in the dendrites of Purkinje cells. Axons are stained green with anti-neurofilament H antibody

Calbindin Antibody - Background

Calbindin (aka. calbindin D28k) is a member of the calcium-binding protein superfamily that includes calmodulin and troponin C. It is predominantly expressed in certain types of neurons, particularly in dendrites and perikarya of the cerebellum and is thought to buffer entry of calcium upon stimulation of glutamate receptors (Andressen et al., 1993). Calbindin has recently been shown to play a critical role in mitochondrial dysfunction and loss of synaptic proteins in vivo in an Alzheimer's disease mouse model (Kook et al., 2014).
