

## **TUFM Antibody (C-term)**

Affinity Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP12916b

## **Specification**

# **TUFM Antibody (C-term) - Product Information**

Application WB,E
Primary Accession P49411

Other Accession <u>P85834</u>, <u>O8BFR5</u>, <u>NP 003312.3</u>

Reactivity
Predicted
Mouse, Rat

# **TUFM Antibody (C-term) - Additional Information**

### **Gene ID 7284**

### **Other Names**

Elongation factor Tu, mitochondrial, EF-Tu, P43, TUFM

### Target/Specificity

This TUFM antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 342-370 amino acids from the C-terminal region of human TUFM.

## **Dilution**

WB~~1:1000

E~~Use at an assay dependent concentration.

#### **Format**

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

#### Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

### **Precautions**

TUFM Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

# **TUFM Antibody (C-term) - Protein Information**

### Name TUFM

**Function** GTP hydrolase that promotes the GTP-dependent binding of aminoacyl-tRNA to the A-site of ribosomes during protein biosynthesis. Also plays a role in the regulation of autophagy and innate immunity. Recruits ATG5-ATG12 and NLRX1 at mitochondria and serves as a checkpoint of the RIGI-MAVS pathway. In turn, inhibits RLR-mediated type I interferon while promoting autophagy.

**Cellular Location**Mitochondrion.

### **TUFM Antibody (C-term) - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

## TUFM Antibody (C-term) - Images

Western blot analysis of TUFM (arrow) using rabbit polyclonal TUFM Antibody (C-term) (Cat. #AP12916b). 293 cell lysates (2 ug/lane) either nontransfected (Lane 1) or transiently transfected (Lane 2) with the TUFM gene.

## TUFM Antibody (C-term) - Background

This gene encodes a protein which participates in protein translation in mitochondria. Mutations in this gene have been associated with combined oxidative phosphorylation deficiency resulting in lactic acidosis and fatal encephalopathy. A pseudogene has been identified on chromosome 17.
