## CHRD Antibody (C-term) - Images

Western blot analysis of anti-CHRD Antibody (C-term) (RB14089) in HepG2 cell line lysates (35ug/lane). CHRD(arrow) was detected using the purified Pab.

Formalin-fixed and paraffin-embedded human hepatocarcinoma tissue reacted with CHRD antibody (C-term) (Cat.#AP1416b), which was peroxidase-conjugated to the secondary antibody, followed by DAB staining. This data demonstrates the use of this antibody for immunohistochemistry; clinical relevance has not been evaluated.

# CHRD Antibody (C-term) - Background

CHRD is a secreted protein that dorsalizes early vertebrate embryonic tissues by binding to ventralizing TGF-beta-like bone morphogenetic proteins and sequestering them in latent complexes. This protein may also have roles in organogenesis and during adulthood.
