

CAMP Antibody (C-term)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP16981b**Specification**

CAMP Antibody (C-term) - Product Information

Application	WB,E
Primary Accession	P49913
Other Accession	NP_004336.2
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Antigen Region	123-152

CAMP Antibody (C-term) - Additional Information**Gene ID** 820**Other Names**

Cathelicidin antimicrobial peptide, 18 kDa cationic antimicrobial protein, CAP-18, hCAP-18, Antibacterial protein FALL-39, FALL-39 peptide antibiotic, Antibacterial protein LL-37, CAMP, CAP18, FALL39

Target/Specificity

This CAMP antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 123-152 amino acids from the C-terminal region of human CAMP.

Dilution

WB~~1:1000

E~~Use at an assay dependent concentration.

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

CAMP Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

CAMP Antibody (C-term) - Protein Information**Name** CAMP ([HGNC:1472](#))

Function Antimicrobial protein that is an integral component of the innate immune system (PubMed:[14978112](#), PubMed:[16637646](#), PubMed:[18818205](#), PubMed:[22879591](#), PubMed:[9736536](#)). Binds to bacterial lipopolysaccharides (LPS) (PubMed:[16637646](#), PubMed:[18818205](#)). Acts via neutrophil N-formyl peptide receptors to enhance the release of CXCL2 (PubMed:[22879591](#)). Postsecretory processing generates multiple cathelicidin antimicrobial peptides with various lengths which act as a topical antimicrobial defense in sweat on skin (PubMed:[14978112](#)). The unprocessed precursor form, cathelicidin antimicrobial peptide, inhibits the growth of Gram-negative E.coli and E.aerogenes with efficiencies comparable to that of the mature peptide LL-37 (in vitro) (PubMed:[9736536](#)).

Cellular Location

Secreted. Vesicle. Note=Stored as pro-peptide in granules and phagolysosomes of neutrophils (PubMed:7529412, PubMed:9736536). Secreted in sweat onto skin (PubMed:14978112).

Tissue Location

Expressed in neutrophilic granulocytes (at protein level) (PubMed:7529412, PubMed:7615076, PubMed:7890387, PubMed:8681941, PubMed:8946956, PubMed:9736536). Expressed in bone marrow (PubMed:7890387). [Antibacterial peptide FALL-39]: Expressed in bone marrow and testis.

CAMP Antibody (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

CAMP Antibody (C-term) - Images

CAMP Antibody (C-term) (Cat. #AP16981b) western blot analysis in NCI-H292 cell line lysates (35ug/lane). This demonstrates the CAMP antibody detected the CAMP protein (arrow).

CAMP Antibody (C-term) - Background

Cathelicidin antimicrobial protein is an antimicrobial

protein found in specific granules of polymorphonuclear leukocytes (PMNs).
