

SIRPB1 Antibody (Center)
Affinity Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP19299C**Specification**

SIRPB1 Antibody (Center) - Product Information

Application	WB,E
Primary Accession	O00241
Other Accession	P78324 , NP_001077379.1
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	43211
Antigen Region	107-134

SIRPB1 Antibody (Center) - Additional Information**Gene ID** 10326**Other Names**

Signal-regulatory protein beta-1, SIRP-beta-1, CD172 antigen-like family member B, CD172b, SIRPB1

Target/Specificity

This SIRPB1 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 107-134 amino acids from the Central region of human SIRPB1.

Dilution

WB~~1:1000

E~~Use at an assay dependent concentration.

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

SIRPB1 Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

SIRPB1 Antibody (Center) - Protein Information**Name** SIRPB1

Function Immunoglobulin-like cell surface receptor involved in the negative regulation of receptor tyrosine kinase-coupled signaling processes. Also participates in the recruitment of tyrosine kinase SYK. Triggers activation of myeloid cells when associated with TYROBP (PubMed:[10604985](#)).

Cellular Location

Cell membrane; Single-pass type I membrane protein

Tissue Location

Detected in monocytes and dendritic cells.

SIRPB1 Antibody (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.

SIRPB1 Antibody (Center) - Images

SIRPB1 Antibody (Center)(Cat. #AP19299c) western blot analysis in A549 cell line lysates (35ug/lane). This demonstrates the SIRPB1 antibody detected the SIRPB1 protein (arrow).

SIRPB1 Antibody (Center) - Background

The protein encoded by this gene is a member of the signal-regulatory-protein (SIRP) family, and also belongs to the immunoglobulin superfamily. SIRP family members are receptor-type transmembrane glycoproteins known to be involved in the negative regulation of receptor tyrosine kinase-coupled signaling processes. This protein was found to interact with TYROBP/DAP12, a protein bearing immunoreceptor tyrosine-based activation motifs. This protein was also reported to participate in the recruitment of tyrosine kinase SYK. Multiple transcript variants encoding different isoforms have been found for this gene. [provided by

RefSeq].
