

## **REG3A Antibody (Center)**

Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP20667c

## **Specification**

# **REG3A Antibody (Center) - Product Information**

Application	WB,E
Primary Accession	<u>Q06141</u>
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	19395

## **REG3A Antibody (Center) - Additional Information**

### Gene ID 5068

#### **Other Names**

Regenerating islet-derived protein 3-alpha, REG-3-alpha, Hepatointestinal pancreatic protein, HIP/PAP, Human proislet peptide, Pancreatitis-associated protein 1, Regenerating islet-derived protein III-alpha, Reg III-alpha, Regenerating islet-derived protein 3-alpha 165 kDa form, Regenerating islet-derived protein 3-alpha 15 kDa form, REG3A, HIP, PAP, PAP1

### Target/Specificity

This REG3A antibody is generated from a rabbit immunized with a KLH conjugated synthetic peptide between 105-139 amino acids from the Central region of human REG3A.

Dilution

WB~~1:1000

E~~Use at an assay dependent concentration.

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

### Precautions

REG3A Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

# **REG3A Antibody (Center) - Protein Information**

Name REG3A (<u>HGNC:8601</u>)

**Function** [Regenerating islet-derived protein 3-alpha 15 kDa form]: Bactericidal C-type lectin which acts exclusively against Gram-positive bacteria and mediates bacterial killing by binding to surface-exposed carbohydrate moieties of peptidoglycan (PubMed:<u>16931762</u>). Binds membrane phospholipids and kills bacteria by forming a hexameric membrane-permeabilizing oligomeric pore (PubMed:<u>24256734</u>).

## **Cellular Location**

Secreted. Note=Found in the apical region of pancreatic acinar cells

### Tissue Location

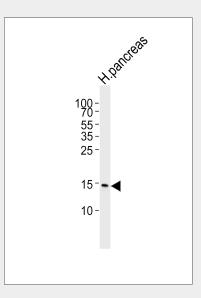

Expressed by keratinocytes (PubMed:27830702). Highly expressed in epidermal keratinocytes of psoriasis patients (at protein level) (PubMed:22727489). Constitutively expressed in intestine. Low expression is found in healthy pancreas. Overexpressed during the acute phase of pancreatitis and in some patients with chronic pancreatitis (PubMed:1469087).

## **REG3A Antibody (Center) - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

**REG3A Antibody (Center) - Images** 

Western blot analysis of lysate from human pancreas tissue lysate, using REG3A Antibody (Center)(Cat. #AP20667c). AP20667c was diluted at 1:1000. A goat anti-rabbit IgG H&L(HRP) at 1:5000 dilution was used as the secondary antibody. Lysate at 35ug.

## **REG3A Antibody (Center) - Background**

Bactericidal C-type lectin which acts exclusively against Gram-positive bacteria and mediates

bacterial killing by binding to surface-exposed carbohydrate moieties of peptidoglycan. Regulates keratinocyte proliferation and differentiation after skin injury via activation of EXTL3-PI3K-AKT signaling pathway.
