

### ASH2L Antibody (Center)

Purified Rabbit Polyclonal Antibody (Pab) Catalog # AP20971a

#### Specification

# ASH2L Antibody (Center) - Product Information

Application Primary Accession Other Accession Reactivity Host Clonality Isotype WB,E <u>Q9UBL3</u> <u>Q91X20</u> Human, Mouse Rabbit Polyclonal Rabbit IgG

### ASH2L Antibody (Center) - Additional Information

Gene ID 9070

**Other Names** Set1/Ash2 histone methyltransferase complex subunit ASH2, ASH2-like protein, ASH2L, ASH2L1

Target/Specificity

This ASH2L antibody is generated from a rabbit immunized with a KLH conjugated synthetic peptide between 237-270 amino acids from the Central region of human ASH2L.

Dilution

WB~~1:1000

E~~Use at an assay dependent concentration.

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

ASH2L Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

## ASH2L Antibody (Center) - Protein Information

Name ASH2L

Synonyms ASH2L1

Function Transcriptional regulator (PubMed:<u>12670868</u>). Component or associated component of

some histone methyltransferase complexes which regulates transcription through recruitment of those complexes to gene promoters (PubMed:<u>19131338</u>). Component of the Set1/Ash2 histone methyltransferase (HMT) complex, a complex that specifically methylates 'Lys-4' of histone H3, but not if the neighboring 'Lys-9' residue is already methylated (PubMed:<u>19556245</u>). As part of the MLL1/MLL complex it is involved in methylation and dimethylation at 'Lys-4' of histone H3 (PubMed:<u>19556245</u>). May play a role in hematopoiesis (PubMed:<u>12670868</u>). In association with RBBP5 and WDR5, stimulates the histone methyltransferase activities of KMT2A, KMT2B, KMT2C, KMT2D, SETD1A and SETD1B (PubMed:<u>21220120</u>, PubMed:<u>22266653</u>).

**Cellular Location** Nucleus.

#### **Tissue Location**

Ubiquitously expressed. Predominantly expressed in adult heart and testis and fetal lung and liver, with barely detectable expression in adult lung, liver, kidney, prostate, and peripheral leukocytes.

## ASH2L Antibody (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- <u>Blocking Peptides</u>
- <u>Dot Blot</u>
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

## ASH2L Antibody (Center) - Images

Western blot analysis of lysates from mouse F9, human K562 cell line (from left to right), using ASH2L Antibody (Center)(Cat. #AP20971a). AP20971a was diluted at 1:1000 at each lane. A goat anti-rabbit IgG H&L(HRP) at 1:10000 dilution was used as the secondary antibody. Lysates at 20ug per lane.

## ASH2L Antibody (Center) - Background

Component of the Set1/Ash2 histone methyltransferase (HMT) complex, a complex that specifically methylates 'Lys-4' of histone H3, but not if the neighboring 'Lys-9' residue is already methylated. As part of the MLL1/MLL complex it is involved in methylation and dimethylation at 'Lys-4' of histone H3. May function as a transcriptional regulator. May play a role in hematopoiesis.
