NICE4 Antibody - Protein Information**Name** UBAP2L ([HGNC:29877](#))**Synonyms** KIAA0144, NICE4**Function**

Recruits the ubiquitination machinery to RNA polymerase II for polyubiquitination, removal and degradation, when the transcription-coupled nucleotide excision repair (TC-NER) machinery fails to resolve DNA damage (PubMed: [35633597](http://www.uniprot.org/citations/35633597)). Plays an important role in the activity of long-term repopulating hematopoietic stem cells (LT- HSCs) (By similarity). Is a regulator of stress granule assembly, required for their efficient formation (PubMed: [29395067](http://www.uniprot.org/citations/29395067), PubMed: [35977029](http://www.uniprot.org/citations/35977029)). Required for proper brain development and neocortex lamination (By similarity).
