PLC beta 2 Antibody - Protein Information**Name** PLCB2 ([HGNC:9055](#))**Function**

The production of the second messenger molecules diacylglycerol (DAG) and inositol 1,4,5-trisphosphate (IP3) is mediated by activated phosphatidylinositol-specific phospholipase C enzymes (PubMed: <http://www.uniprot.org/citations/1644792> target="_blank">1644792, PubMed: <http://www.uniprot.org/citations/9188725> target="_blank">9188725). In neutrophils, participates in a phospholipase C-activating N-formyl peptide-activated GPCR (G protein- coupled receptor) signaling pathway by promoting RASGRP4 activation by DAG, to promote neutrophil functional responses (By similarity).
