GPR102 Polyclonal Antibody - Protein Information**Name** TAAR8**Synonyms** GPR102, TA5, TAR5, TRAR5**Function**

Olfactory receptor specific for trace amines (By similarity). Trace amine compounds are enriched in animal body fluids and act on trace amine-associated receptors (TAARs) to elicit both intraspecific and interspecific innate behaviors (By similarity). Ligand-binding causes a conformation change that triggers signaling via G alpha proteins, possibly G(i)/G(o) G alpha proteins (PubMed:<http://www.uniprot.org/citations/25391046> target="_blank">25391046).

Cellular Location

Cell membrane; Multi-pass membrane protein

Tissue Location

Expressed in kidney and amygdala. Not expressed in other tissues or brain regions tested.
