**Vinexin Polyclonal Antibody - Protein Information****Name** SORBS3**Synonyms** SCAM1**Function**

Vinexin alpha isoform promotes up-regulation of actin stress fiber formation. Vinexin beta isoform plays a role in cell spreading and enhances the activation of JNK/SAPK in response to EGF stimulation by using its third SH3 domain.

**Cellular Location**

[Isoform Alpha]: Cell junction. Cytoplasm, cytoskeleton. Note=Localized at cell- extracellular

matrix junctions (By similarity). Both isoforms were localized at focal adhesion and cell-cell adhesion sites

**Tissue Location**

Both isoforms are expressed in different tissues like heart, placenta, brain, skeletal muscle and pancreas. Isoform beta is especially found in liver
