

**CCRL1 Polyclonal Antibody**  
**Catalog # AP68896****Specification**

---

**CCRL1 Polyclonal Antibody - Product Information**

Application	WB, IF
Primary Accession	<a href="#">Q9NPB9</a>
Reactivity	Human, Mouse
Host	Rabbit
Clonality	Polyclonal

**CCRL1 Polyclonal Antibody - Additional Information****Gene ID** 51554**Other Names**

CCRL1; CCBP2; CCR11; VSHK1; C-C chemokine receptor type 11; C-C CKR-11; CC-CKR-11; CCR-11; CC chemokine receptor-like 1; CCRL1; CCX CKR

**Dilution**

WB~~Western Blot: 1/500 - 1/2000. Immunofluorescence: 1/200 - 1/1000. ELISA: 1/40000. Not yet tested in other applications.

IF~~1:50~200

**Format**

Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.09% (W/V) sodium azide.

**Storage Conditions**

-20°C

**CCRL1 Polyclonal Antibody - Protein Information****Name** ACKR4**Synonyms** CCBP2, CCR11, CCRL1, VSHK1**Function**

Atypical chemokine receptor that controls chemokine levels and localization via high-affinity chemokine binding that is uncoupled from classic ligand-driven signal transduction cascades, resulting instead in chemokine sequestration, degradation, or transcytosis. Also known as interceptor (internalizing receptor) or chemokine-scavenging receptor or chemokine decoy receptor. Acts as a receptor for chemokines CCL2, CCL8, CCL13, CCL19, CCL21 and CCL25. Chemokine-binding does not activate G-protein-mediated signal transduction but instead induces beta-arrestin recruitment, leading to ligand internalization. Plays an important role in controlling the migration of immune and cancer cells that express chemokine receptors CCR7 and CCR9, by reducing the availability of CCL19, CCL21, and CCL25 through internalization. Negatively regulates CXCR3-induced chemotaxis. Regulates T-cell development in the thymus.

**Cellular Location**

Early endosome. Recycling endosome. Cell membrane; Multi-pass membrane protein.

Note=Predominantly localizes to endocytic vesicles, and upon stimulation by the ligand is internalized via caveolae. Once internalized, the ligand dissociates from the receptor, and is targeted to degradation while the receptor is recycled back to the cell membrane

**Tissue Location**

Predominantly expressed in heart. Lower expression in lung, pancreas, spleen, colon, skeletal muscle and small intestine

**CCRL1 Polyclonal Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.
