

Phospho-IKB alpha (Ser32) Rabbit mAb
Catalog # AP75603**Specification****Phospho-IKB alpha (Ser32) Rabbit mAb - Product Information**

Application	WB, IP
Primary Accession	P25963
Reactivity	Human, Mouse
Host	Rabbit
Clonality	Monoclonal Antibody
Calculated MW	35609

Phospho-IKB alpha (Ser32) Rabbit mAb - Additional Information**Gene ID** 4792**Other Names**
NFKBIA**Dilution**
WB~~1/500-1/1000
IP~~N/A**Format**
Liquid**Phospho-IKB alpha (Ser32) Rabbit mAb - Protein Information****Name** NFKBIA**Synonyms** IKBA, MAD3, NFKBI**Function**

Inhibits the activity of dimeric NF-kappa-B/REL complexes by trapping REL (RELA/p65 and NFKB1/p50) dimers in the cytoplasm by masking their nuclear localization signals (PubMed:1493333, PubMed:36651806, PubMed:7479976). On cellular stimulation by immune and pro-inflammatory responses, becomes phosphorylated promoting ubiquitination and degradation, enabling the dimeric RELA to translocate to the nucleus and activate transcription (PubMed:7479976, PubMed:7628694, PubMed:7796813, PubMed:7878466).

Cellular Location

Cytoplasm. Nucleus. Note=Shuttles between the nucleus and the cytoplasm by a nuclear

localization signal (NLS) and a CRM1-dependent nuclear export.

Phospho-IKB alpha (Ser32) Rabbit mAb - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)
