

SOD2 Antibody
Purified Rabbit Polyclonal Antibody (Pab)
Catalog # AP7579a**Specification**

SOD2 Antibody - Product Information

Application	FC, WB,E
Primary Accession	P04179
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG

SOD2 Antibody - Additional Information**Gene ID** 6648**Other Names**

Superoxide dismutase [Mn], mitochondrial, SOD2

Target/Specificity

This SOD2 antibody is generated from rabbits immunized with human recombinant SD protein.

Dilution

FC~~1:10~50

WB~~1:1000

E~~Use at an assay dependent concentration.

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

SOD2 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

SOD2 Antibody - Protein Information**Name** SOD2**Function** Destroys superoxide anion radicals which are normally produced within the cells and which are toxic to biological systems.**Cellular Location**

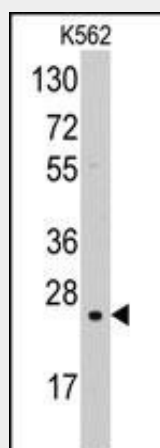

Mitochondrion matrix.

SOD2 Antibody - Protocols

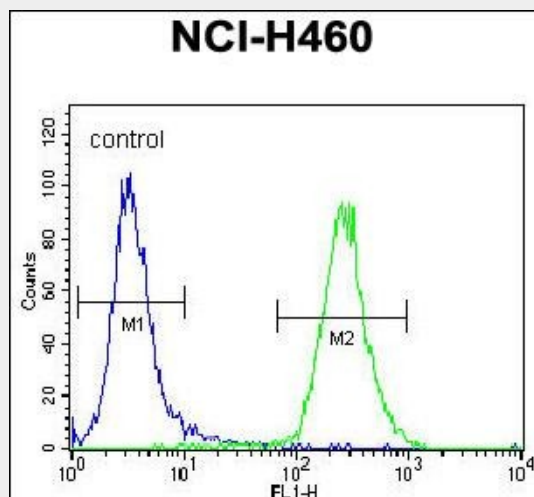

Provided below are standard protocols that you may find useful for product applications.

SOD2 Antibody - Images

Western blot analysis of anti-SOD2 Pab (Cat.#AP7979a) in K562 cell line lysates (35ug/lane). SOD2 (arrow) was detected using the purified Pab.

SOD2 Antibody (Cat. #AP7579a) flow cytometric analysis of NCI-H460 cells (right histogram) compared to a negative control cell (left histogram). FITC-conjugated goat-anti-rabbit secondary antibodies were used for the analysis.

SOD2 Antibody - Background

SOD2 is a member of the iron/manganese superoxide dismutase family. It is a mitochondrial protein that forms a homotetramer and binds one manganese ion per subunit. This protein binds to the superoxide byproducts of oxidative phosphorylation and converts them to hydrogen peroxide and diatomic oxygen. Mutations in this gene have been associated with idiopathic cardiomyopathy (IDC), premature aging, sporadic motor neuron disease, and cancer.
