

MERTK Antibody

Rabbit mAb Catalog # AP90331

Specification

MERTK Antibody - Product Information

Application WB, IHC, IP
Primary Accession Q12866
Clonality Monoclonal

Other Names

MER; RP38; c-mer; MERTK; MERK; STK kinase;

Isotype Rabbit IgG
Host Rabbit
Calculated MW 110249 Da

MERTK Antibody - Additional Information

Dilution WB~~1:1000 IHC~~1:100~500

IP~~N/A

Purification Affinity-chromatography

Immunogen A synthesized peptide derived from human

MERTK

Description MERTK signaling plays a role in various

processes such as macrophage clearance of apoptotic cells, platelet aggregation, cytoskeleton reorganization and

cytoskeleton reorganization and engulfment. Functions in the retinal

pigment epithelium (RPE) as a regulator of

rod outer segments fragments

phagocytosis. Plays also an important role

in inhibition of Toll-like receptors

(TLRs)-mediated innate immune response by activating STAT1, which selectively induces production of suppressors of cytokine signaling SOCS1 and SOCS3. Rabbit IgG in phosphate buffered saline,

pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid

freeze / thaw cycle.

MERTK Antibody - Protein Information

Storage Condition and Buffer

Name MERTK

Synonyms MER

Function

Receptor tyrosine kinase that transduces signals from the extracellular matrix into the cytoplasm by binding to several ligands including LGALS3, TUB, TULP1 or GAS6. Regulates many physiological processes including cell survival, migration, differentiation, and phagocytosis of apoptotic cells (efferocytosis). Ligand binding at the cell surface induces autophosphorylation of MERTK on its intracellular domain that provides docking sites for downstream signaling molecules. Following activation by ligand, interacts with GRB2 or PLCG2 and induces phosphorylation of MAPK1, MAPK2, FAK/PTK2 or RAC1. MERTK signaling plays a role in various processes such as macrophage clearance of apoptotic cells, platelet aggregation, cytoskeleton reorganization and engulfment (PubMed:32640697 | Functions in the retinal pigment epithelium (RPE) as a regulator of rod outer segments fragments phagocytosis. Also plays an important role in inhibition of Toll-like receptors (TLRs)-mediated innate immune response by activating STAT1, which selectively induces production of suppressors of cytokine signaling SOCS1 and SOCS3.

Cellular Location

Cell membrane; Single-pass type I membrane protein

Tissue Location

Not expressed in normal B- and T-lymphocytes but is expressed in numerous neoplastic B- and T-cell lines. Highly expressed in testis, ovary, prostate, lung, and kidney, with lower expression in spleen, small intestine, colon, and liver

MERTK Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- <u>Immunofluorescence</u>
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

MERTK Antibody - Images

Western blot analysis of MERTK expression in HEK293 cell lysates.
