

# nNOS (neuronal) Antibody

Rabbit mAb Catalog # AP90381

## **Specification**

## nNOS (neuronal) Antibody - Product Information

Application WB, IHC, FC, ICC, IP

Primary Accession P29475
Reactivity Rat

Clonality Monoclonal

**Other Names** 

bNOS; Constitutive NOS; IHPS1; N-NOS; NC-NOS; Neuronal NOS; nitric oxide synthase 1 (neuronal);

Nitric oxide synthase, brain; nNOS; NOS; NOS type I; NOS1;

Isotype Rabbit IgG
Host Rabbit
Calculated MW 160970 Da

## nNOS (neuronal) Antibody - Additional Information

Dilution WB~~1:1000

IHC~~1:100~500 FC~~1:10~50 ICC~~N/A IP~~N/A

Purification Affinity-chromatography

Immunogen A synthesized peptide derived from human

nNOS (neuronal)

Description nNOS nitric oxide synthase 1, neuronal

form. Produces nitric oxide which is a messenger molecule with diverse functions

and displays many properties of a neurotransmitter in the brain and peripheral nervous system. May be an effector enzyme for the dystrophin

complex.

Storage Condition and Buffer Rabbit IgG in phosphate buffered saline,

pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid

freeze / thaw cycle.

## nNOS (neuronal) Antibody - Protein Information

Name NOS1 (HGNC:7872)

#### **Function**

Produces nitric oxide (NO) which is a messenger molecule with diverse functions throughout the body. In the brain and peripheral nervous system, NO displays many properties of a

neurotransmitter. Probably has nitrosylase activity and mediates cysteine S-nitrosylation of cytoplasmic target proteins such SRR.

#### **Cellular Location**

Cell membrane, sarcolemma {ECO:0000250|UniProtKB:Q9Z0J4}; Peripheral membrane protein. Cell projection, dendritic spine {ECO:0000250|UniProtKB:P29476}. Note=In skeletal muscle, it is localized beneath the sarcolemma of fast-twitch muscle fiber by associating with the dystrophin glycoprotein complex (By similarity) In neurons, enriched in dendritic spines (By similarity) {ECO:0000250|UniProtKB:P29476, ECO:0000250|UniProtKB:Q9Z0J4}

#### **Tissue Location**

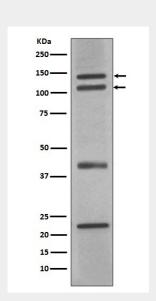

Isoform 1 is ubiquitously expressed: detected in skeletal muscle and brain, also in testis, lung and kidney, and at low levels in heart, adrenal gland and retina. Not detected in the platelets. Isoform 3 is expressed only in testis. Isoform 4 is detected in testis, skeletal muscle, lung, and kidney, at low levels in the brain, but not in the heart and adrenal gland

## nNOS (neuronal) Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

## nNOS (neuronal) Antibody - Images

Western blot analysis of nNOS expression in Mouse brain cell lysate.
