

## SHP1 Antibody

Rabbit mAb Catalog # AP90400

## **Specification**

## **SHP1 Antibody - Product Information**

Application WB, IHC
Primary Accession
Reactivity
Rat

Clonality Monoclonal

**Other Names** 

70Z-SHP; EC 3.1.3.48; HCP; HCPH; PTN6; PTP-1C; PTP1C; PTPN6; SH-PTP1; SHP1;

Isotype Rabbit IgG
Host Rabbit
Calculated MW 67561 Da

# **SHP1** Antibody - Additional Information

Dilution WB~~1:1000

IHC~~1:100~500

Purification Affinity-chromatography

Immunogen A synthesized peptide derived from human

SHP1

Description The protein encoded by this gene is a

member of the protein tyrosine

phosphatase (PTP) family. PTPs are known to be signaling molecules that regulate a variety of cellular processes including cell growth, differentiation, mitotic cycle, and

oncogenic transformation.

Storage Condition and Buffer Rabbit IgG in phosphate buffered saline,

pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid

freeze / thaw cycle.

# **SHP1 Antibody - Protein Information**

## Name PTPN6

Synonyms HCP, PTP1C

### **Function**

Tyrosine phosphatase enzyme that plays important roles in controlling immune signaling pathways and fundamental physiological processes such as hematopoiesis (PubMed:<a href="http://www.uniprot.org/citations/14739280" target="\_blank">14739280</a>, PubMed:<a href="http://www.uniprot.org/citations/29925997" target="\_blank">29925997</a>).

Dephosphorylates and negatively regulate several receptor tyrosine kinases (RTKs) such as EGFR,

Tel: 858.875.1900 Fax: 858.875.1999

PDGFR and FGFR, thereby modulating their signaling activities (PubMed: <a href="http://www.uniprot.org/citations/21258366" target=" blank">21258366</a>, PubMed:<a href="http://www.uniprot.org/citations/9733788" target=" blank">9733788</a>). When recruited to immunoreceptor tyrosine-based inhibitory motif (ITIM)-containing receptors such as immunoglobulin-like transcript 2/LILRB1, programmed cell death protein 1/PDCD1, CD3D, CD22, CLEC12A and other receptors involved in immune regulation, initiates their dephosphorylation and subsequently inhibits downstream signaling events (PubMed:<a href="http://www.uniprot.org/citations/11907092" target=" blank">11907092</a>, PubMed:<a href="http://www.uniprot.org/citations/14739280" target="\_blank">14739280</a>, PubMed:<a href="http://www.uniprot.org/citations/37932456" target="\_blank">37932456</a>, PubMed:<a href="http://www.uniprot.org/citations/38166031" target=" blank">38166031</a>). Modulates the signaling of several cytokine receptors including IL-4 receptor (PubMed: <a href="http://www.uniprot.org/citations/9065461" target=" blank">9065461</a>). Additionally, targets multiple cytoplasmic signaling molecules including STING1, LCK or STAT1 among others involved in diverse cellular processes including modulation of T-cell activation or cGAS-STING signaling (PubMed: <a href="http://www.uniprot.org/citations/34811497" target=" blank">34811497</a>, PubMed:<a href="http://www.uniprot.org/citations/38532423" target=" blank">38532423</a>). Within the nucleus, negatively regulates the activity of some transcription factors such as NFAT5 via direct dephosphorylation. Also acts as a key transcriptional regulator of hepatic gluconeogenesis by controlling recruitment of RNA polymerase II to the PCK1 promoter together with STAT5A (PubMed:<a href="http://www.uniprot.org/citations/37595871" target=" blank">37595871</a>).

#### **Cellular Location**

Cytoplasm, Nucleus Note=In neurons, translocates into the nucleus after treatment with angiotensin II (By similarity). Shuttles between the cytoplasm and nucleus via its association with PDPK1.

#### **Tissue Location**

Isoform 1 is expressed in hematopoietic cells. Isoform 2 is expressed in non-hematopoietic cells

### SHP1 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture
