

Triosephosphate isomerase Antibody

Rabbit mAb Catalog # AP92364

Specification

Triosephosphate isomerase Antibody - Product Information

Application WB, FC
Primary Accession
Reactivity
Rat

Clonality Monoclonal

Other Names

HEL-S-49; TIM; TPI1; TPID;

Isotype Rabbit IgG
Host Rabbit
Calculated MW 26669 Da

Triosephosphate isomerase Antibody - Additional Information

Dilution WB~~1:1000 FC~~1:10~50

Purification Affinity-chromatography

Immunogen A synthesized peptide derived from human

Triosephosphate isomerase

Description Triosephosphate isomerase (TIM) catalyses

the reversible interconversion of G3P and DHAP. Only G3P can be used in glycolysis,

therefore TIM is essential for energy

production, allowing two molecules of G3P to be produced for every glucose molecule,

thereby doubling the energy yield.

Storage Condition and Buffer Rabbit IgG in phosphate buffered saline ,

pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid

freeze / thaw cycle.

Triosephosphate isomerase Antibody - Protein Information

Name TPI1

Synonyms TPI

Function

Triosephosphate isomerase is an extremely efficient metabolic enzyme that catalyzes the interconversion between dihydroxyacetone phosphate (DHAP) and D-glyceraldehyde-3-phosphate (G3P) in glycolysis and gluconeogenesis.

Cellular Location

Cytoplasm {ECO:0000255|PROSITE-ProRule:PRU10127}.

Triosephosphate isomerase Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

Triosephosphate isomerase Antibody - Images

Western blot analysis of Triosephosphate isomerase expression in HeLa cell lysate.
