

# **CD84 Antibody**

Rabbit mAb Catalog # AP92741

## **Specification**

# **CD84 Antibody - Product Information**

Application WB, IHC
Primary Accession Q9UIB8
Clonality Monoclonal

**Other Names** 

CD84; CDw84; hCD84; LY9B; mCD84; SLAMF5;

Isotype Rabbit IgG
Host Rabbit
Calculated MW 38782 Da

### **CD84 Antibody - Additional Information**

Dilution WB~~1:1000

IHC~~1:100~500

Purification Affinity-chromatography

Immunogen A synthesized peptide derived from human

**CD84** 

Description Plays a role as adhesion receptor

functioning by homophilic interactions and

by clustering. Recruits SH2

domain-containing proteins SH2D1A/SAP.
Storage Condition and Buffer
Rabbit IgG in phosphate buffered saline,
pH 7.4, 150mM NaCl, 0.02% sodium azide

and 50% glycerol. Store at +4°C short term. Store at -20°C long term. Avoid

freeze / thaw cycle.

#### **CD84 Antibody - Protein Information**

Name CD84

Synonyms SLAMF5

### **Function**

Self-ligand receptor of the signaling lymphocytic activation molecule (SLAM) family. SLAM receptors triggered by homo- or heterotypic cell-cell interactions are modulating the activation and differentiation of a wide variety of immune cells and thus are involved in the regulation and interconnection of both innate and adaptive immune response. Activities are controlled by presence or absence of small cytoplasmic adapter proteins, SH2D1A/SAP and/or SH2D1B/EAT-2. Can mediate natural killer (NK) cell cytotoxicity dependent on SH2D1A and SH2D1B (By similarity). Increases proliferative responses of activated T-cells and SH2D1A/SAP does not seem be required for this process. Homophilic interactions enhance interferon gamma/IFNG secretion in lymphocytes and induce platelet stimulation via a SH2D1A-dependent pathway. May serve as a marker for

hematopoietic progenitor cells (PubMed: <a href="http://www.uniprot.org/citations/11564780" target=" blank">11564780</a>, PubMed:<a href="http://www.uniprot.org/citations/12115647" target="blank">12115647</a>, PubMed:<a href="http://www.uniprot.org/citations/12928397" target="\_blank">12928397</a>, PubMed:<a href="http://www.uniprot.org/citations/12962726" target="blank">12962726</a>, PubMed:<a href="http://www.uniprot.org/citations/16037392" target=" blank">16037392</a>) Required for a prolonged T-cell:B-cell contact, optimal T follicular helper function, and germinal center formation. In germinal centers involved in maintaining B-cell tolerance and in preventing autoimmunity (By similarity). In mast cells negatively regulates high affinity immunoglobulin epsilon receptor signaling; independent of SH2D1A and SH2D1B but implicating FES and PTPN6/SHP-1 (PubMed:<a href="http://www.uniprot.org/citations/22068234" target=" blank">22068234</a>). In macrophages enhances LPS-induced MAPK phosphorylation and NF-kappaB activation and modulates LPS-induced cytokine secretion; involving ITSM 2 (By similarity). Positively regulates macroautophagy in primary dendritic cells via stabilization of IRF8; inhibits TRIM21-mediated proteasomal degradation of IRF8 (PubMed: <a href="http://www.uniprot.org/citations/29434592" target=" blank">29434592</a>).

#### **Cellular Location**

Cell membrane; Single-pass type I membrane protein

#### **Tissue Location**

Predominantly expressed in hematopoietic tissues, such as lymph node, spleen and peripheral leukocytes. Expressed in macrophages, B-cells, monocytes, platelets, thymocytes, T-cells and dendritic cells. Highly expressed in memory T-cells. Expressed in mast cells.

# **CD84 Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- <u>Immunofluorescence</u>
- Immunoprecipitation
- Flow Cytomety
- Cell Culture
