

Anti-ABCB5 Reference Antibody (Brigham and Women's patent anti-ABCB5)

Recombinant Antibody Catalog # APR10762

Specification

Anti-ABCB5 Reference Antibody (Brigham and Women's patent anti-ABCB5) - Product Information

Application Primary Accession Reactivity Clonality Isotype

Calculated MW

FC, Kinetics, Animal Model
O2M3G0
Human, Mouse
Monoclonal
IgG1
145 KDa

Anti-ABCB5 Reference Antibody (Brigham and Women's patent anti-ABCB5) - Additional Information

Target/Specificity ABCB5

Endotoxin

< 0.001EU/ μg, determined by LAL method.

Conjugation Unconjugated

Expression system

CHO Cell

Format

Purified monoclonal antibody supplied in PBS, pH6.0, without preservative. This antibody is purified through a protein A column.

Anti-ABCB5 Reference Antibody (Brigham and Women's patent anti-ABCB5) - Protein Information

Name ABCB5 (HGNC:46)

Function

Energy-dependent efflux transporter responsible for decreased drug accumulation in multidrug-resistant cells (PubMed:12960149, PubMed:15205344, PubMed:15899824, PubMed:22306008). Specifically present in limbal stem cells, where it plays a key role in corneal development and repair (By similarity).

Cellular Location

Cell membrane; Multi-pass membrane protein $\{ECO:0000255|PROSITE-ProRule:PRU00441, ECO:0000269|PubMed:12960149\}$

Tissue Location

Expressed by CD133-expressing progenitor cells among epidermal melanocytes (at protein level). Widely expressed with specific expression in pigment cells. Highly expressed in several malignant tissues: highly expressed in clinical melanomas, with low expression in normal skin. In melanoma, marks malignant melanoma- initiating cells (MMIC), in which clinical virulence resides as a consequence of unlimited self-renewal capacity, resulting in inexorable tumor progression and metastasis. Also highly expressed in a number of leukemia cells. Expressed in basal limbal epithelium

Anti-ABCB5 Reference Antibody (Brigham and Women's patent anti-ABCB5) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

Anti-ABCB5 Reference Antibody (Brigham and Women's patent anti-ABCB5) - Images

Anti-ABCB5 Reference Antibody (Brigham and Women's patent anti-ABCB5) on SDS-PAGE under reducing (R) condition. The gel was stained with Coomassie Blue. The purity of the protein is greater than 90%

The purity of Anti-ABCB5 Reference Antibody (Brigham and Women's patent anti-ABCB5)is more

than 95% ,determined by SEC-HPLC.
