

ApoA4 Antibody
Catalog # ASC11312**Specification**

ApoA4 Antibody - Product Information

Application	WB, E
Primary Accession	P06727
Other Accession	NP_990269 , 337
Reactivity	Human, Chicken
Host	Rabbit
Clonality	Polyclonal
Isotype	IgG
Application Notes	ApoA4 antibody can be used for detection of ApoA4 by Western blot at 1 µg/mL.

ApoA4 Antibody - Additional InformationGene ID **337****Target/Specificity**

ApoA4 antibody was raised against a 20 amino acid synthetic peptide near the carboxy terminus of chicken ApoA4.

The immunogen is located within the last 50 amino acids of ApoA4.

Reconstitution & Storage

ApoA4 antibody can be stored at 4°C for three months and -20°C, stable for up to one year. As with all antibodies care should be taken to avoid repeated freeze thaw cycles. Antibodies should not be exposed to prolonged high temperatures.

Precautions

ApoA4 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

ApoA4 Antibody - Protein Information**Name** APOA4**Function**

May have a role in chylomicrons and VLDL secretion and catabolism. Required for efficient activation of lipoprotein lipase by ApoC-II; potent activator of LCAT. Apoa-IV is a major component of HDL and chylomicrons.

Cellular Location

Secreted.

Tissue Location

Synthesized primarily in the intestine and secreted in plasma

ApoA4 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

ApoA4 Antibody - Images

Western blot analysis of ApoA4 in chicken small intestine tissue lysate with ApoA4 antibody at 1 μ g/mL

ApoA4 Antibody - Background

ApoA4 Antibody: Apolipoprotein A4 (also known as ApoA-IV) is a plasma protein that is O-linked glycoprotein after proteolytic processing. ApoA4 is a major constituent of HDL and it also can be found on the surface of newly synthesized chylomicrons. The physiological function of ApoA4 is not completely identified so far, but several evidences from vitro studies indicate that this apolipoprotein involves in several steps of the reverse cholesterol transport pathway, which transports cholesterol from peripheral cells back to the liver.
