

#### **ULK1 Antibody**

Catalog # ASC11653

#### **Specification**

### **ULK1 Antibody - Product Information**

Application WB, IHC-P, IF, E

Primary Accession O75385
Other Accession NP 003556, 4507831

Reactivity
Human, Mouse, Rat
Rabbit

Clonality Polyclonal Isotype IgG

Calculated MW Predicted: 116 kDa

Observed: 105 kDa KDa

Application Notes ULK1 Antibody can be used for detection of

ULK1 by Western blot at 1 μg/mL.

### **ULK1 Antibody - Additional Information**

Gene ID 8408

### Target/Specificity

ULK1; Two alternatively spliced transcript variants encoding different isoforms have been identified. ULK1 antibody is predicted to not cross-react with ULK2.

#### **Reconstitution & Storage**

ULK1 antibody can be stored at 4°C for three months and -20°C, stable for up to one year.

#### **Precautions**

ULK1 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

## **ULK1 Antibody - Protein Information**

Name ULK1 {ECO:0000303|PubMed:9693035, ECO:0000312|HGNC:HGNC:12558}

### **Function**

Serine/threonine-protein kinase involved in autophagy in response to starvation (PubMed:<a href="http://www.uniprot.org/citations/18936157" target="\_blank">18936157</a>, PubMed:<a href="http://www.uniprot.org/citations/21460634" target="\_blank">21460634</a>, PubMed:<a href="http://www.uniprot.org/citations/21795849" target="\_blank">21795849</a>, PubMed:<a href="http://www.uniprot.org/citations/23524951" target="\_blank">23524951</a>, PubMed:<a href="http://www.uniprot.org/citations/25040165" target="\_blank">25040165</a>, PubMed:<a href="http://www.uniprot.org/citations/29487085" target="\_blank">29487085</a>, PubMed:<a href="http://www.uniprot.org/citations/31123703" target="\_blank">31123703</a>). Acts upstream of phosphatidylinositol 3-kinase PIK3C3 to regulate the formation of autophagophores, the precursors of autophagosomes (PubMed:<a href="http://www.uniprot.org/citations/18936157" target="\_blank">18936157</a>, PubMed:<a href="http://www.uniprot.org/citations/21460634" target=" blank">21460634</a>, PubMed:<a href="http://www.uniprot.org/citations/21795849"

Tel: 858.875.1900 Fax: 858.875.1999

target="\_blank">21795849</a>, PubMed:<a href="http://www.uniprot.org/citations/25040165" target="\_blank">25040165</a>). Part of regulatory feedback loops in autophagy: acts both as a downstream effector and negative regulator of mammalian target of rapamycin complex 1 (mTORC1) via interaction with RPTOR (PubMed:<a

href="http://www.uniprot.org/citations/21795849" target=" blank">21795849</a>). Activated via phosphorylation by AMPK and also acts as a regulator of AMPK by mediating phosphorylation of AMPK subunits PRKAA1, PRKAB2 and PRKAG1, leading to negatively regulate AMPK activity (PubMed:<a href="http://www.uniprot.org/citations/21460634" target=" blank">21460634</a>). May phosphorylate ATG13/KIAA0652 and RPTOR; however such data need additional evidences  $(PubMed: <a href="http://www.uniprot.org/citations/18936157" target="\_blank">18936157 </a>).$ Plays a role early in neuronal differentiation and is required for granule cell axon formation (PubMed:<a href="http://www.uniprot.org/citations/11146101" target=" blank">11146101</a>). Also phosphorylates SESN2 and SQSTM1 to regulate autophagy (PubMed: <a href="http://www.uniprot.org/citations/25040165" target=" blank">25040165</a>, PubMed:<a href="http://www.uniprot.org/citations/37306101" target="blank">37306101</a>). Phosphorylates FLCN, promoting autophagy (PubMed: <a href="http://www.uniprot.org/citations/25126726" target=" blank">25126726</a>). Phosphorylates AMBRA1 in response to autophagy induction, releasing AMBRA1 from the cytoskeletal docking site to induce autophagosome nucleation (PubMed: <a href="http://www.uniprot.org/citations/20921139" target=" blank">20921139</a>). Phosphorylates ATG4B, leading to inhibit autophagy by decreasing both proteolytic activation and

**Cellular Location** 

target=" blank">28821708</a>).

Cytoplasm, cytosol. Preautophagosomal structure. Note=Under starvation conditions, is localized to puncate structures primarily representing the isolation membrane that sequesters a portion of the cytoplasm resulting in the formation of an autophagosome.

delipidation activities of ATG4B (PubMed:<a href="http://www.uniprot.org/citations/28821708"

## **Tissue Location**

Ubiquitously expressed. Detected in the following adult tissues: skeletal muscle, heart, pancreas, brain, placenta, liver, kidney, and lung

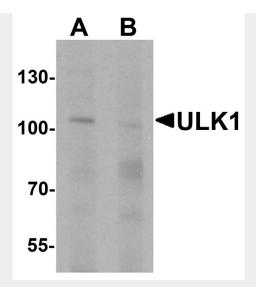

## **ULK1 Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

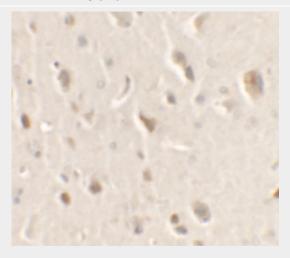

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

# **ULK1 Antibody - Images**

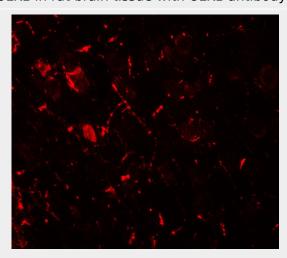

Western blot analysis of ULK1 in rat brain tissue lysate with ULK1 antibody at 1  $\mu$ g/mL in (A) the absence and (B) the presence of blocking peptide.

Immunohistochemistry of ULK1 in rat brain tissue with ULK1 antibody at 2.5 μg/ml.

Immunofluorescence of ULK1 in rat brain tissue with ULK1 antibody at 20 μg/ml.

# **ULK1 Antibody - Background**

ULK1 Antibody: ULK1, also known as ATG1, is a key serine/threonine protein kinase probably acting

Tel: 858.875.1900 Fax: 858.875.1999

at the most upstream step of autophagosome formation. Knockout of ULK1 results in a severe defect in the autophagy pathway. ULK1 is highly conserved among eukaryotes, and are the Unc-51-like kinases, ULK1 and ULK2 in mammals. ULK1 is ubiquitously expressed and involved in autophagy in response to starvation. It is the target of the TOR kinase signaling pathway that regulates autophagy through the control of phosphorylation status of ATG13. ULK1 also plays a role early in neuronal differentiation.
