

# Anti-Mouse IgM (H&L) Secondary Antibody

Goat Polyclonal, Unconjugated Catalog # ASR2923

#### **Specification**

### Anti-Mouse IgM (H&L) Secondary Antibody - Product Information

Anti-MOUSE IgM (H&L) (GOAT) Antibody Description

Host

Conjugate Unconjugated **Target Species** Mouse Clonality **Polyclonal** 

Application WB, E, IC

**Application Note** ELISA 1:20,000-1:100,000; Western Blot

1:2,000-1:10,000;Immunochemistry

1:1,000-1:5,000 Lyophilized

**Physical State** Host Isotype laG

Target Isotype

IaM (H&L) Buffer 0.02 M Potassium Phosphate, 0.15 M

> Sodium Chloride, pH 7.2 Mouse IgM whole molecule

**Immunogen** Reconstitution Volume

Reconstitution Buffer Restore with deionized water (or

equivalent)

Stabilizer None

Preservative 0.01% (w/v) Sodium Azide

# Anti-Mouse IgM (H&L) Secondary Antibody - Additional Information

### **Shipping Condition**

**Ambient** 

#### **Purity**

Anti-MOUSE IgM (H&L) (GOAT) Antibody is an IgG fraction antibody purified from monospecific antiserum by a multi-step process which includes delipidation, salt fractionation and ion exchange chromatography followed by extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Goat Serum, Mouse IgM and Mouse Serum. Some light chain cross reactivity may occur against Mouse IgG.

### **Storage Condition**

Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

### **Precautions Note**

This product is for research use only and is not intended for therapeutic or diagnostic applications.

### Anti-Mouse IgM (H&L) Secondary Antibody - Protein Information

### Anti-Mouse IgM (H&L) Secondary Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

# Anti-Mouse IgM (H&L) Secondary Antibody - Images

# Anti-Mouse IgM (H&L) Secondary Antibody - Background

Mouse IgM antibody recognizes the mu chain of the Mouse IgM. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Biotin, anti-Rabbit Serum, Mouse IgM and Mouse Serum. No reaction was observed against Mouse IgA or Mouse IgG. ELISA was used to confirm minimal cross reactivity against other mouse heavy or light chain isotypes. Anti-Mouse IgM antibody is ideal with investigators involved in serum component protein research.
