

**IKBKG Antibody (monoclonal) (M01)****Mouse monoclonal antibody raised against a full length recombinant IKBKG.****Catalog # AT2499a****Specification**

---

**IKBKG Antibody (monoclonal) (M01) - Product Information**

Application	WB, IHC, IF, E
Primary Accession	<a href="#">Q9Y6K9</a>
Other Accession	<a href="#">BC050612</a>
Reactivity	Human
Host	mouse
Clonality	Monoclonal
Isotype	IgG1 Kappa
Calculated MW	48198

**IKBKG Antibody (monoclonal) (M01) - Additional Information****Gene ID** 8517**Other Names**

NF-kappa-B essential modulator, NEMO, FIP-3, Ikb kinase-associated protein 1, IKKAP1, Inhibitor of nuclear factor kappa-B kinase subunit gamma, I-kappa-B kinase subunit gamma, IKK-gamma, IKKG, Ikb kinase subunit gamma, NF-kappa-B essential modifier, IKBKG, FIP3, NEMO

**Target/Specificity**

IKBKG (AAH50612, 1 a.a. ~ 419 a.a) full-length recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

**Dilution**

WB~~1:500~1000

IHC~~1:100~500

IF~~1:50~200

E~~N/A

**Format**

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

**Storage**

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

**Precautions**

IKBKG Antibody (monoclonal) (M01) is for research use only and not for use in diagnostic or therapeutic procedures.

**IKBKG Antibody (monoclonal) (M01) - Protocols**

Provided below are standard protocols that you may find useful for product applications.

#### IKBKG Antibody (monoclonal) (M01) - Images

Immunofluorescence of monoclonal antibody to IKBKG on HeLa cell. [antibody concentration 8 ug/ml]

Antibody Reactive Against Recombinant Protein. Western Blot detection against Immunogen (71.83 KDa) .

IKBKG monoclonal antibody (M01), clone 4G9 Western Blot analysis of IKBKG expression in K-562 (Cat # AT2499a)

Immunoperoxidase of monoclonal antibody to IKBKG on formalin-fixed paraffin-embedded human stomach. [antibody concentration 3 ug/ml]

Detection limit for recombinant GST tagged IKBKG is approximately 0.1ng/ml as a capture antibody.

Proximity Ligation Analysis of protein-protein interactions between RALBP1 and IKBKG HeLa cells were stained with anti-RALBP1 rabbit purified polyclonal 1:1200 and anti-IBKKG mouse monoclonal antibody 1:50. Each red dot represents the detection of protein-protein interaction complex, and nuclei were counterstained with DAPI (blue).

#### **IKBKG Antibody (monoclonal) (M01) - Background**

This gene encodes the regulatory subunit of the inhibitor of kappaB kinase (IKK) complex, which activates NF-kappaB resulting in activation of genes involved in inflammation, immunity, cell survival, and other pathways. Mutations in this gene result in incontinentia pigmenti, hypohidrotic ectodermal dysplasia, and several other types of immunodeficiencies. Multiple transcript variants encoding different isoforms have been found for this gene. A pseudogene highly similar to this locus is located in an adjacent region of the X chromosome.

#### **IKBKG Antibody (monoclonal) (M01) - References**

Immune deficiency caused by impaired expression of nuclear factor-kappaB essential modifier (NEMO) because of a mutation in the 5' untranslated region of the NEMO gene. Mooster JL, et al.
