

## SCARB2 Antibody (monoclonal) (M01)

Mouse monoclonal antibody raised against a partial recombinant SCARB2. Catalog # AT3784a

## **Specification**

## SCARB2 Antibody (monoclonal) (M01) - Product Information

Application
Primary Accession
Other Accession
Reactivity
Host
Clonality

Isotype Calculated MW E 014108 NM\_005506 Human mouse Monoclonal IgG2a Kappa

54290

## SCARB2 Antibody (monoclonal) (M01) - Additional Information

#### Gene ID 950

### **Other Names**

Lysosome membrane protein 2, 85 kDa lysosomal membrane sialoglycoprotein, LGP85, CD36 antigen-like 2, Lysosome membrane protein II, LIMP II, Scavenger receptor class B member 2, CD36, SCARB2, CD36L2, LIMP2, LIMPII

## Target/Specificity

SCARB2 (NP\_005497, 339 a.a.  $\sim$  437 a.a) partial recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

#### **Dilution**

E~~N/A

### **Format**

Clear, colorless solution in phosphate buffered saline, pH 7.2.

#### Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

# **Precautions**

SCARB2 Antibody (monoclonal) (M01) is for research use only and not for use in diagnostic or therapeutic procedures.

# SCARB2 Antibody (monoclonal) (M01) - Protocols

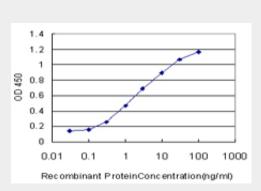

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides

- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

## SCARB2 Antibody (monoclonal) (M01) - Images

Detection limit for recombinant GST tagged SCARB2 is approximately 0.1ng/ml as a capture antibody.

## SCARB2 Antibody (monoclonal) (M01) - Background

The protein encoded by this gene is a type III glycoprotein that is located primarily in limiting membranes of lysosomes and endosomes. Studies of the similar protein in mice and rat suggested that this protein may participate in membrane transportation and the reorganization of endosomal/lysosomal compartment. Deficiency of the similar protein in mice was reported to impair cell membrane transport processes and cause pelvic junction obstruction, deafness, and peripheral neuropathy.
