

Purified Anti-Human CD45RO (UCHL1) Antibody
Catalog # ATB10314**Specification**

Purified Anti-Human CD45RO (UCHL1) Antibody - Product Information

Application	WB, IHC-P, IHC-F, IF, FC, IP
Isotype	Mouse IgG2a, kappa
Concentration	0.5 mg/mL
Reactivity	Human
Formulation	10 mM NaH ₂ PO ₄ , 150 mM NaCl, 0.09% NaN ₃ , pH7.2
Host	Mouse

Purified Anti-Human CD45RO (UCHL1) Antibody - Additional Information

Gene ID	5788
Gene Name	PTPRC
Format	
Purified	

Preparation

This monoclonal antibody preparation was purified from tissue culture supernatant via affinity chromatography. For In Vivo Ready™ (IVR) products, each preparation is also evaluated for endotoxin levels using the LAL assay. It is recommended to store the product undiluted at 4°C. Do not freeze.

Application Notes

This purified format is guaranteed to be >90% pure as determined by SDS-PAGE analysis. Citations are provided as a convenience to you - please consult Materials and Methods sections for additional details about the use of any product in these publications.

Storage Conditions

2-8°C

Purified Anti-Human CD45RO (UCHL1) Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

Purified Anti-Human CD45RO (UCHL1) Antibody - Background

The UCHL1 antibody reacts with the human CD45 isoform known as CD45RO, a protein tyrosine phosphatase of 220 kDa. CD45 is one of the most abundant hematopoietic markers, and is expressed on all leukocytes (the Leukocyte Common Antigen, LCA). Various isoforms are generated and expressed in cell-specific patterns. With their broad cell distribution, CD45 isoforms are critical for many leukocyte functions, regulating signal transduction and cell activation associated with the T cell receptor, B cell receptor, and IL-2 receptor. Other forms of CD45, with restricted cellular expression, include CD45R (B220), CD45RA, CD45RB, and others. The UCHL1 antibody is widely used as a marker for human CD45RO expression on thymocytes, activated memory T cells, monocytes, macrophages and granulocytes. The antibody is reported to be cross-reactive for Chimpanzee CD45RO.
