Zebrafish arnt2 Antibody (Center) - Additional Information

Gene ID 64277

Other Names

Aryl hydrocarbon receptor nuclear translocator 2, ARNT protein 2, zfARNT2, arnt2 {ECO:0000312|ZFIN:ZDB-GENE-001207-3}

Target/Specificity

This Zebrafish arnt2 antibody is generated from rabbits immunized with a KLH conjugated synthetic peptide between 475-501 amino acids from the central region of zebrafish arnt2.

Dilution

WB~~1:1000

E~~Use at an assay dependent concentration.

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein A column, followed by peptide affinity purification.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

Zebrafish arnt2 Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

Zebrafish arnt2 Antibody (Center) - Protein Information

Name arnt2 {ECO:0000312|ZFIN:ZDB-GENE-001207-3}

Function Transcription factor that plays a role in the development of the hypothalamo-pituitary axis. Specifically recognizes the xenobiotic response element (XRE) (By similarity). Isoform 1 acts

as a transcriptional activator (PubMed: <u>11072074</u>). Isoform 3 acts as a transcriptional repressor (PubMed: <u>110960127</u>, PubMed: <u>11072074</u>).

Cellular Location
Nucleus

Tissue Location

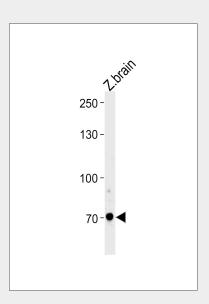

Isoform 1 and isoform 2 are most highly expressed in the brain, eye and skeletal muscle and to a lower degree in liver, heart, kidney and swim bladder. Isoform 3 is most highly expressed in the eye, forebrain, midbrain, hindbrain, skeletal muscle, gills and brain but is barely detectable in liver, heart, kidney and swim bladder. Before the pharyngula period isoform 3 is expressed throughout the entire embryo and during this period extensively in the brain and eye.

Zebrafish arnt2 Antibody (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

Zebrafish arnt2 Antibody (Center) - Images

Zebrafish arnt2 Antibody (Center) (Cat. #Azb10020a) western blot analysis in zebrafish brain tissue lysates (35ug/lane). This demonstrates the Zebrafish ARNT2 antibody detected the zebrafish ARNT2 protein (arrow).

Zebrafish arnt2 Antibody (Center) - Background

Specifically recognizes the xenobiotic response element (XRE). Isoform 1 acts as a transcriptional activator. Isoform 3 acts as a transcriptional repressor.
