

Insulin-Like Growth Factor II (69-84)
Synthetic Peptide
Catalog # SP2625b**Specification**

Insulin-Like Growth Factor II (69-84) - Product Information

Primary Accession [P41694](#)
Other Accession [P01344](#), [P23695](#)
Sequence **NH2-DVSTPPTVLDPDNFPY-COOH**

Insulin-Like Growth Factor II (69-84) - Additional Information**Other Names**

Insulin-like growth factor II, IGF-II, Insulin-like growth factor II, Preptin, IGF2

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

Insulin-Like Growth Factor II (69-84) - Protein Information

Name IGF2 {ECO:0000250|UniProtKB:P01344}

Synonyms IGF-2 {ECO:0000305}

Function

The insulin-like growth factors possess growth-promoting activity (By similarity). Major fetal growth hormone in mammals. Plays a key role in regulating fetoplacental development. IGF2 is influenced by placental lactogen. Also involved in tissue differentiation. In adults, involved in glucose metabolism in adipose tissue, skeletal muscle and liver. Acts as a ligand for integrin which is required for IGF2 signaling. Positively regulates myogenic transcription factor MYOD1 function by facilitating the recruitment of transcriptional coactivators, thereby controlling muscle terminal differentiation (By similarity). Inhibits myoblast differentiation and modulates metabolism via increasing the mitochondrial respiration rate (By similarity).

Cellular Location

Secreted {ECO:0000250|UniProtKB:P01344, ECO:0000250|UniProtKB:P09535}
